**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the prior art of record teaches a method of fabricating a liquid crystal display, which has a step of locating a spacer on a substrate 5 by ejecting a droplet of spacer dispersion liquid containing a spacer with a particle diameter R microns from a nozzle of an ink-jet apparatus and depositing the droplet on the substrate surface. The prior art of record also teaches a method of fabricating a liquid crystal display, which has a step of locating a spacer on a substrate 5 by ejecting a droplet of spacer dispersion liquid containing a spacer with a particle diameter R microns from a nozzle of an ink-jet apparatus and depositing the droplet on the substrate surface, a hole diameter of the nozzle being 7R (microns) or larger. The prior art of record also teaches a method of fabricating a liquid crystal display, which has a step of locating a spacer on a substrate 5 by ejecting a droplet of spacer dispersion liquid containing a spacer with a particle diameter R microns from a nozzle of an ink-jet apparatus and depositing the droplet on the substrate surface, the spacer dispersion liquid having surface tension of 30 to 50 mN/m and a contact angle on the substrate surface of 30 to 90°. The prior art of record does not teach nor suggest the combination of the above limitation with the step of locating the spacer on the substrate, depositing the droplet of the spacer dispersion liquid on the substrate surface at the interval of deposition D (microns) satisfying a relationship of the following formula (1):  $D > \frac{35}{3} \times [R / (2 - (3 \cos \theta + \cos^3 \theta))]^{1/3}$ .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
